The Management,

Tankwa Tours and Travel,

Addis Ababa, Ethiopia.

Subject: Announcement of Expanded Application Development Skills and Technical Capacities

Dear Sir / Madam,

I am writing to bring to your respectful attention the significant expansion of my technical skills and application development capabilities over the course of recent months.

My development journey has been both structured and progressive. Beginning with the foundational principles of RESTful API design using Microsoft .NET, I have advanced through successive stages of learning.

I am currently applying the above competencies in the active development of a full-stack application system built with ASP.NET Core Web API as the backend and React (Vite) as the frontend.

I would welcome any opportunity to discuss my skills and capabilities further, or to demonstrate the applications I have built.

Current Technical Skills & Competencies

Technology / Skill	Applied Capability
ASP.NET Core Web API	Design and implementation of RESTful API endpoints using .NET 10.
ASP.NET Core MVC	Full MVC architecture including Razor Views and Controllers.
C# Programming	Object-oriented programming with async/await and LINQ.
Entity Framework Core	Code-First database management and migrations.
JWT Authentication	Generation and validation of JSON Web Tokens.
React.js	Frontend development using React and Vite.
Tailwind CSS	Responsive UI styling for modern applications.

Yours respectfully,

Dereje Abtew

Application Developer
