

ENGINEERING SERVICE SYSTEM

User Acceptance Testing (UAT) Sign-Off

Module: Property Estimation Request Management

Document Date

July 1, 2026

Version 1.0

Document Title	User Acceptance Testing (UAT) Sign-Off
System	Engineering Service System
Module	Property Estimation Request Management
Testing Environment	UAT
Business Owner / Receiving Unit	Engineering & Valuation Unit
Document Date	July 1, 2026
Version	1.0

1. Purpose

This document records the formal User Acceptance Testing sign-off for the Property Estimation Request Management module of the Engineering Service System. It confirms that the solution has been reviewed by the designated business stakeholders and is ready for operational handover, subject to the decision and approval of the Engineering & Valuation Unit.

2. Objective

The objective of this sign-off is to confirm that the Engineering Service System:

- Supports the multi-step estimation workflow (Branch Manager → Engineering Manager → Engineering Officer)
- Captures and validates property and applicant information
- Manages document attachments throughout the workflow
- Enforces role-based access control with granular permissions
- Provides visibility of estimation reports and filtered documents to authorized roles
- Is ready for controlled business use in line with the agreed UAT scope

3. Scope of UAT

3.1 In-Scope Functional Areas

No.	Functional Area	UAT Coverage
1	User Authentication & Authorization	Login with JWT, role-based access, permission enforcement
2	Estimation Request Creation (Branch Manager)	Capture of applicant, property, and location information
3	Document Upload (Branch Manager)	Upload of required supporting documents at request creation
4	Engineering Manager Review Workflow	Engineering Manager approval and rejection of submitted requests (acts directly on Pending requests)

No.	Functional Area	UAT Coverage
5	Engineering Officer Assignment	Assignment and unassignment of Engineering Officers to Manager Approved requests
6	Engineer Estimation Submission	Upload of Estimation Excel, Relevant Photo, and Estimation Report
7	Final Estimation Upload (Engineering Manager)	Upload of Final Estimation Excel after engineer submission
8	Estimation Report Visibility	Automatic display of Estimation Report to Engineering Manager and Branch Manager upon engineer submission
9	Request Edit & Resend Workflow	Branch Manager ability to edit and resubmit rejected requests
10	Organizational Structure Management	Management of Departments and Branches
11	User & Role Management	User creation, role assignment, and permission management
12	Notification System	In-system notifications for workflow events
13	Ethiopian Location Support	Region, city, sub-city, and kebele selection for property location

3.2 Out-of-Scope Items

The following items are outside the scope of this UAT:

- Integration with external banking core systems
- SMS or email notification delivery
- Mobile application testing
- Performance and load testing
- Penetration and security testing
- Data migration from legacy systems

4. UAT Summary

Based on completed UAT activities, the Engineering Service System has been reviewed against the agreed business and operational workflow. The current version is considered:

- Functionally aligned with the consolidated property estimation workflow (Branch Manager → Engineering Manager → Engineering Officer)
- Suitable for operational use in UAT
- Ready for business sign-off and handover decision by the Engineering & Valuation Unit

5. High-Level Functional Coverage Confirmed

No.	Feature / Capability	Business Validation Confirmed	Pass	Fail	Remarks
1	User Login & Session Management	Users can log in with valid credentials and receive a JWT token with role-based permissions. Session persists across page navigation. Expired or invalid JWT tokens result in automatic logout with an appropriate message.	☐	☐	
2	Role-Based Access Control	Each role (Branch Manager, Engineering Manager, Engineering Officer, Admin) sees only the actions and data permitted by their assigned permissions.	☐	☐	
3	Estimation Request Creation (Branch Manager)	Branch Manager users can create estimation requests by entering applicant name, owner name, LHC No., location (city, sub-city, kebele), plot area, building type, purpose, and estimation type.	☐	☐	
4	Supporting Document Upload at Creation	Branch Manager users can upload required supporting documents (e.g., Construction Permit, LHC, Approved Plan) when submitting a new request.	☐	☐	
5	Project Finance Request Handling	Requests with Purpose = Project Finance capture additional fields (Project Finance Document Type, Bill of Quantity) correctly.	☐	☐	
6	Branch Manager Request Visibility	Branch Manager users can view all requests submitted from their assigned branch.	☐	☐	
7	Engineering Manager All-Request Visibility	Engineering Manager users can view all requests across all branches, including requests in Pending status submitted directly by Branch Managers.	☐	☐	
8	Engineering Manager Approval Workflow	Engineering Manager can approve a Pending request with an approval date and description, advancing the status to Manager Approved.	☐	☐	
9	Engineering Manager Rejection Workflow	Engineering Manager can reject a Pending request with a rejection reason, setting the status to Rejected and notifying the Branch Manager.	☐	☐	
10	Engineering Officer Assignment	Engineering Manager can assign an Engineering Officer to a Manager Approved request. System displays current officer workload and provides smart assignment recommendations based on sub-city and kebele match.	☐	☐	
11	Engineering Officer Unassignment	Engineering Manager can unassign an Engineering Officer from a request, returning the status to Manager Approved.	☐	☐	
12	Engineering Officer Assigned Request Visibility	Engineering Officer can view only the requests assigned to them.	☐	☐	
13	Engineer Estimation Submission (Phase 1)	Engineering Officer can submit Estimation Excel and Relevant Photo to complete the initial estimation. Status advances to Estimated.	☐	☐	
14	Engineer Rejection of Assignment	Engineering Officer can reject an assigned request with a reason, setting the status to Rejected and notifying the Branch Manager.	☐	☐	
15	Final Estimation Upload (Engineering Manager)	Engineering Manager can upload the Final Estimation Excel file after reviewing the engineer's submitted documents.	☐	☐	
16	Estimation Report Submission (Phase 2)	After Final Estimation is uploaded, Engineering Officer can submit the Estimation Report. The "Send Estimation Report" action becomes available in the request actions menu.	☐	☐	
17	Automatic Estimation Report Visibility	Upon Engineer submitting the Estimation Report, it is automatically displayed to both Engineering Manager and Branch Manager under the "Estimation Report" section — without any manual send action required.	☐	☐	
18	Estimation Report View & Download	Engineering Manager and Branch Manager can view and download the Estimation Report directly from the Request Details dialog.	☐	☐	
19	Branch Manager Edit of Pending Request	Branch Manager can edit a request while it is in Pending status (before Engineering Manager acts), without changing the workflow status.	☐	☐	
20	Branch Manager Resend of Rejected Request	Branch Manager can edit and resubmit a Rejected request. The status resets to Pending, the workflow restarts at the Engineering Manager step, and the previous rejection reason is preserved in the audit trail.	☐	☐	

No.	Feature / Capability	Business Validation Confirmed	Pass	Fail	Remarks
21	Workflow Audit Trail	Engineering Manager action date/description, Engineering Officer action date, and rejection reasons (including rejecting party: Engineering Manager or Engineering Officer) are recorded and visible in the Request Details dialog.	☐	☐	
22	Department Management	Admin can create, edit, and deactivate departments.	☐	☐	
23	Branch Management	Admin can create, edit, and deactivate branches linked to departments.	☐	☐	
24	User Management	Admin can create users, assign roles, reset passwords, and deactivate users.	☐	☐	
25	Role & Permission Management	Admin can create roles and assign granular permissions. Permission changes take effect on the next login.	☐	☐	
26	Dashboard Summary Statistics	Dashboard displays total requests, pending count, and completed count relevant to the logged-in user's role. Quick actions are shown based on user permissions (e.g., "New Request" only for Branch Manager).	☐	☐	
27	In-System Notifications	Users receive in-system notifications for relevant workflow events: new request submitted (Engineering Manager notified), approval (Branch Manager notified), rejection with reason (Branch Manager notified), Engineering Officer assignment, and Estimation Report submission.	☐	☐	
28	Ethiopian Location Data	City, sub-city, and kebele dropdowns are populated with correct Ethiopian location data. Historical locations from past requests are also surfaced for reuse.	☐	☐	

6. Roles & Permissions Reference

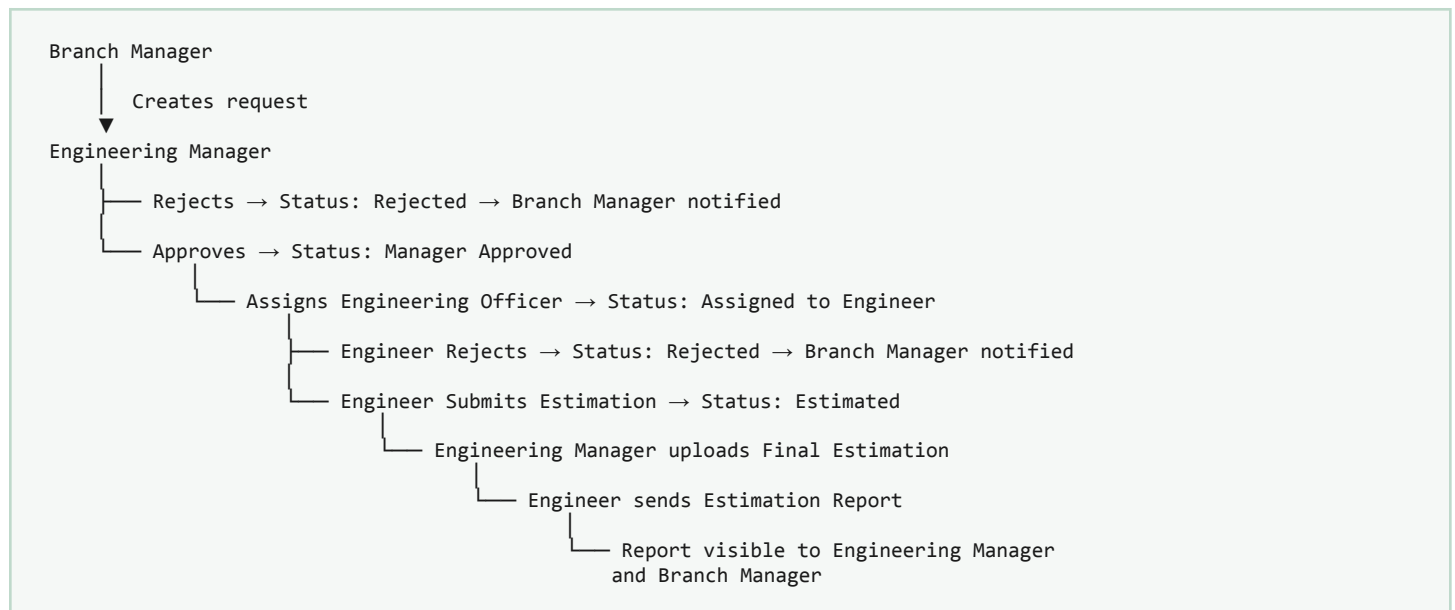

The following roles are seeded by default in the system:

Role	Key Permissions
Admin	All permissions — full system access
Branch Manager	create requests; edit Pending, re send request
Engineering Manager	View all requests across all branches; approve/reject Pending requests; assign/unassign Engineering Officers; manage officer workload; upload Final Estimation Excel; view and download Estimation Report
Engineering Officer	View assigned requests; edit assigned request details; submit Estimation Excel and Relevant Photo (Phase 1); send Estimation Report after Final Estimation is uploaded (Phase 2); reject assigned requests

7. Request Lifecycle Status Reference

Status	Description
Pending	Submitted by Branch Manager, awaiting Engineering Manager review
Manager Approved	Approved by Engineering Manager, ready for Engineering Officer assignment
Assigned to Engineer	Engineering Officer assigned to the request
Estimated	Engineering Officer completed estimation submission
Rejected	Rejected at any stage (Engineering Manager or Engineering Officer)

8. Simplified Workflow Reference

Resend Flow: Branch Manager can edit and resubmit any Rejected request → Status resets to Pending → Workflow restarts at Engineering Manager step → Previous rejection reason preserved in audit trail.

9. Business Readiness Statement

The Engineering Service System property estimation module is hereby presented for sign-off to the Engineering & Valuation Unit as the receiving business owner. By signing this document, the Engineering & Valuation Unit confirms that:

- The estimation workflow (Branch Manager → Engineering Manager → Engineering Officer → Estimation Report) has been reviewed in the UAT environment
- The delivered scope is acceptable for business handover
- Role-based access controls and document visibility rules are operating as expected
- The module is ready to proceed to the next release or deployment stage, subject to internal approval processes

10. Sign-Off Authority

Role / Responsibility	Name	Signature	Date
Engineering Unit — Tested By			
Engineering Unit Manager — Approved By			
IT / Technical Lead — System Owner			
Business Owner / Compliance			

11. Final Statement

This document serves as the formal UAT sign-off record for the Property Estimation Request Management module of the Engineering Service System and is intended to support business handover, audit reference, and release governance approval.
