

Weekly Action Plan

Dereje Abteu

KEY ACTIVITIES

- Complete all pending comments and newly added requirements on the Engineering Project shared via Telegram
- Guide and support the engineering team through the post-completion review and handoff process
- Deepen technical knowledge in Node.js (Express) or Laravel, based on the team's agreed direction for the upcoming Project Management System

MAIN PRIORITY

Delivering the Engineering Project updates in full — addressing all feedback and added requirements — to keep the project on track and ready for the next phase.

EXPECTED OUTCOMES

- ✓ All Engineering Project comments resolved and new requirements implemented and shared
- ✓ Engineering team successfully guided through task completion with clear direction for next steps
- ✓ A solid foundational understanding of the chosen backend framework, ready to contribute effectively to the Project Management System
